ONEPATH WHOLESALE BALANCED TRUST

Product Disclosure Statement (PDS) Update and Continuous Disclosure Notice | 16 June 2023

This PDS Update and Continuous Disclosure Notice provides important information and amends the following documents issued on 30 September 2022:

- OnePath Wholesale Balanced Trust Product Disclosure Statement
- OnePath & OptiMix Wholesale Trusts Additional Information Guide

UPDATED INFORMATION

How we invest your money

OnePath Wholesale Balanced Trust Product Disclosure Statement page references: 4

Instructions: Replace the fund information with the new information below

OnePath Wholesale Balanced Trust – Fund Information

Description

The Trust is suitable for investors seeking both income and capital growth through a well-diversified portfolio, with a medium level of risk tolerance.

Investment objective

To provide capital growth over the medium to long term by investing in a diversified portfolio with a balanced exposure to growth and defensive assets and to achieve total returns after fees in excess of the benchmark¹ over a rolling five-year period.

Investment strategy

The Trust gains its exposure to a diversified portfolio of investments through the underlying fund. The underlying fund invests in a mix of investment managers.

The balanced nature of the Trust generally provides an equal exposure to growth assets such as property, Australian and international shares and alternative assets and defensive assets such as fixed interest and cash².

A mix of passive, factor-based and active investment managers may be selected to manage the assets of the underlying fund providing differing yet complementary investment styles to achieve more consistent excess returns.

The underlying fund is authorised to utilise approved derivative instruments for risk management purposes and investment efficiency. Please note that derivative instruments cannot be used to gear the underlying fund's exposure.

The underlying managers may utilise strategies for the management of currency exposure. It is the strategy of the underlying fund that international currency exposure may be hedged. The underlying fund has the capacity to change the level and nature of any currency overlay or allocation to underlying managers to manage currency risk³.

Commencement date

May 1993

Minimum time horizon

5 years

Investor profile

Moderate - Moderate investment trusts are more likely to suit investors who are seeking higher medium-term returns and are willing to accept the possibility of negative returns.

Standard Risk Measure

Asset allocation

Asset class	Benchmark (%)	Range ⁴ (%)
Alternatives – defensive	4	0–15
Cash and short-term securities	11	0–25
Diversified fixed interest	35	25–45
Property ⁵	9	0–20
Australian shares	15	5–25
International shares	20	10–30
Alternatives – growth	6	0–20

1 The Trust's benchmark incorporates the applicable indices for each asset class weighted against the Trust's benchmark asset allocation.

2 For reasons of investment efficiency, the Trust may gain its exposure to each sector by holding units in other Insignia Financial Group unit trusts and/or through direct investment holdings.

3 Refer to page 3 for further information on currency risks.

4 Actual asset allocation may move outside the above ranges and specified percentages from time to time. The underlying investments of the Trust will generally be managed within these ranges and target (or neutral) asset allocation percentages. However, we may revise the asset ranges and specified percentages, without notice to investors, in response to factors affecting the underlying investments such as changes in economic conditions and market movements. Where, in our opinion, a material alteration impacts the nature of the Trust, investors will be given prior notice.

5 Property asset sector may include exposure to Australian direct property and Australian and international property securities.

OnePath Wholesale High Growth Trust – Fund Information

Description

The Trust is suitable for investors seeking long-term capital growth through a well-diversified portfolio of growth assets, who can accept the volatility associated with a portfolio with significant growth asset exposure.

Investment objective

To provide capital growth over the long term by investing in a diversified portfolio of predominantly growth assets with minimal defensive asset exposure and to achieve total returns after fees in excess of the benchmark¹ over a rolling seven-year period.

Investment strategy

The Trust gains its exposure to a diversified portfolio of investments through the underlying fund. The underlying fund invests in a mix of investment managers.

The high growth nature of the Trust provides a majority exposure to growth assets such as property, Australian and international shares and alternative assets, with a lesser exposure to defensive assets, such as fixed interest and cash².

A mix of passive, factor-based and active investment managers may be selected to manage the assets of the underlying fund providing differing yet complementary investment styles to achieve more consistent excess returns.

The underlying fund is authorised to utilise approved derivative instruments for risk management purposes and investment efficiency. Please note that derivative instruments cannot be used to gear the underlying fund's exposure.

The underlying managers may utilise strategies for the management of currency exposure. It is the strategy of the underlying fund that international currency exposure may be hedged. The underlying fund has the capacity to change the level and nature of any currency overlay or allocation to underlying managers to manage currency risk³.

Commencement date

October 2001

Minimum time horizon

7–10 years

Investor profile

High Growth – High growth investment trusts are more likely to suit investors seeking to maximise long-term returns and are willing to accept the possibility of greater negative returns over medium-term periods.

Standard Risk Measure

Asset allocation

Asset class	Benchmark (%)	Range ⁴ (%)
Alternatives - defensive	5	0–15
Cash and short-term securities	1	0–15
Diversified fixed interest	4	0–15
Property ⁵	11	0–25
Australian shares	31	20–45
International shares	37	25–50
Alternatives – growth	11	0–25

1 The Trust's benchmark incorporates the applicable indices for each asset class weighted against the Trust's benchmark asset allocation.

2 For reasons of investment efficiency, the Trust may gain its exposure to each sector by holding units in other Insignia Financial Group unit trusts and/or through direct investment holdings.

3 Refer to page 5 for further information on currency risks.

4 Actual asset allocation may move outside the above ranges and specified percentages from time to time. The underlying investments of the Trust will generally be managed within these ranges and target (or neutral) asset allocation percentages. However, we may revise the asset ranges and specified percentages, without notice to investors, in response to factors affecting the underlying investments such as changes in economic conditions and market movements. Where, in our opinion, a material alteration impacts the nature of the Trust, investors will be given prior notice.

5 Property asset sector may include exposure to Australian direct property and Australian and international property securities.

OnePath Wholesale Managed Growth Trust – Fund Information

Description

The Trust is suitable for investors seeking capital growth with some income through a well-diversified portfolio, who are prepared to accept some short-term volatility.

Investment objective

To provide capital growth over the medium to long term by investing in a diversified portfolio of mostly growth and defensive assets and to achieve total returns after fees in excess of the benchmark¹ over a rolling five-year period.

Investment strategy

The Trust gains its exposure to a diversified portfolio of investments through the underlying fund. The underlying fund invests in a mix of investment managers.

The growth nature of the Trust provides a greater exposure to growth assets, such as property, Australian and international shares and alternative assets, with a moderate exposure to defensive assets, such as fixed interest and cash².

A mix of passive, factor-based and active investment managers may be selected to manage the assets of the underlying fund providing differing yet complementary investment styles to achieve more consistent excess returns.

The underlying fund is authorised to utilise approved derivative instruments for risk management purposes and investment efficiency. Please note that derivative instruments cannot be used to gear the underlying fund's exposure.

The underlying managers may utilise strategies for the management of currency exposure. It is the strategy of the underlying fund that international currency exposure may be hedged. The underlying fund has the capacity to change the level and nature of any currency overlay or allocation to underlying managers to manage currency risk³.
