<td>Investment strategy</td>
<td>The fund’s neutral portfolio benchmark comprises a portfolio of published indexes, approximately 30% of which represent interest bearing assets and 70% of which represent growth assets. The fund invests in Australian and International shares and bonds, listed property, global listed infrastructure and cash. While the cash, global bond and infrastructure exposures are through BlackRock indexed funds, the strategy gains its exposure to the other asset classes via BlackRock active funds. Ultimately, the strategy implements a portfolio that combines strategic asset allocation with active management in order to achieve the fund’s objective.</td>
