Investment objective

To provide stable returns over the medium term by investing in a diversified portfolio of mostly defensive assets with some growth asset exposure and to achieve total returns after fees in excess of the benchmark over a rolling three-year period.

Investment strategy

The fund gains its exposure to a diversified portfolio of investments through a mix of investment managers. The conservative nature of the fund provides a greater exposure to defensive assets, such as fixed interest and cash with a moderate exposure to growth assets, such as property, Australian and international shares and alternative assets. A mix of passive, factor-based and active investment managers may be selected to manage the assets of the fund providing differing yet complementary investment styles to achieve more consistent excess returns. The fund is authorised to utilise approved derivative instruments for risk management purposes and investment efficiency. Please note that derivative instruments cannot be used to gear the fund's exposure. The underlying managers may utilise strategies for the management of currency exposure. It is the strategy of the fund that international currency exposure may be hedged. The fund has the capacity to change the level and nature of any currency overlay or allocation to underlying managers to manage currency risk.

† Returns quoted use the unit price which is calculated using the net asset values for the relevant month end. The prices shown may differ from the actual unit price if an investor is applying for or redeeming an investment. Actual unit prices will be confirmed following any transaction on an investor's investment. Please note that all returns are after the deduction of management fees and expenses and assumes all distributions are re-invested. Where applicable, management fees have been deducted at the highest entry fee option rate. No allowance has been made for entry or exit fees.
