Investment objective

To provide capital growth over the long term by investing in a diversified portfolio of predominantly growth assets with minimal defensive asset exposure and to achieve total returns after fees in excess of the benchmark over a rolling seven-year period.

Investment strategy

The fund gains its exposure to a diversified portfolio of investments through a mix of investment managers. The high growth nature of the fund provides a majority exposure to growth assets such as property, Australian and international shares and alternative assets, with a lesser exposure to defensive assets, such as fixed interest and cash. A mix of passive, factor-based and active investment managers may be selected to manage the assets of the fund providing differing yet complementary investment styles to achieve more consistent excess returns. The fund is authorised to utilise approved derivative instruments for risk management purposes and investment efficiency. Please note that derivative instruments cannot be used to gear the fund's exposure. The underlying managers may utilise strategies for the management of currency exposure. It is the strategy of the fund that international currency exposure may be hedged. The fund has the capacity to change the level and nature of any currency overlay or allocation to underlying managers to manage currency risk.

Market and portfolio review

Global shares (hedged) made an exceptionally strong quarterly return of 14.9%. The start of the Iran War in late February saw global shares fall sharply in March. April's announcement of a ceasefire between Iran and the US has allowed global share markets to make an encouraging recovery. For global shares (unhedged), the rise in the Australian dollar has served to restrain the quarterly return to 13.6%.

Optimism on Artifical Intelligence (AI) has been the key driver of US share prices achieving historic highs in early June. The largest technology companies such as Alphabet, Amazon, Microsoft and Nvidia are rapidly raising their AI capital investment which is also supporting US economic activity.

While Asian share markets also suffered sharp falls in March, they ended the quarter in positive territory. Korea and Taiwan recorded astonishing quarterly gains in local currency terms as investors were optimistic that AI would lead to robust demand for Asian computer chips. However Chinese shares disappointed as weak consumer spending and a struggling property sector weighed on sentiment.

Australian shares delivered a strong 4.1% quarterly return, but this was a mixed performance across industry sectors and stocks. Some of the sectors that were beaten down in March have made a recovery over the past quarter. Notably there were exceptionally strong gains for the Information Technology and Australian property securities sectors after a tough start to the year. However, there were some disappointing performances. The Energy sector sharply retreated with as oil and natural gas prices fell with the Iran – US ceasefire. Health Care also recorded a sharp loss with weak profit guidance from major companies in Cochlear and CSL.

Future investment strategy
