Market and portfolio review

In the September quarter, bond market yields and returns were largely driven by a shift in monetary policy and macroeconomic dynamics. The US Federal Reserve cut interest rates by 0.25% in September, its first rate reduction of the year, in response to softening labour market data and persistent economic uncertainty. Contributors of performance including Manager Janus Henderson in the domestic space and Manager Brandywine in the global space. No major detractors.

Future investment strategy

The Trust generally gains its investment exposure by investing in a well-diversified portfolio of Australian and international fixed interest managers. The underlying fixed interest investments include a range of international and domestic government bonds, corporate debt and asset backed securities.
