Investment strategy

The fund gains its exposure to a diversified portfolio of investments through a mix of investment managers. The balanced nature of the fund generally provides an equal exposure to growth assets such as property, Australian and international shares and alternative assets and defensive assets such as fixed interest and cash. A mix of passive, factor-based and active investment managers may be selected to manage the assets of the fund providing differing yet complementary investment styles to achieve more consistent excess returns. The fund is authorised to utilise approved derivative instruments for risk management purposes and investment efficiency. Please note that derivative instruments cannot be used to gear the fund's exposure. The underlying managers may utilise strategies for the management of currency exposure. It is the strategy of the fund that international currency exposure may be hedged.
