Investment objective

To provide capital growth over the long term by investing in a diversified portfolio of predominantly growth assets with minimal defensive asset exposure and to achieve total returns after fees in excess of the benchmark over a rolling seven-year period.

Investment strategy

The fund gains its exposure to a diversified portfolio of investments through a mix of investment managers. The high growth nature of the fund provides a majority exposure to growth assets such as property, Australian and international shares and alternative assets, with a lesser exposure to defensive assets, such as fixed interest and cash. A mix of passive, factor-based and active investment managers may be selected to manage the assets of the fund providing differing yet complementary investment styles to achieve more consistent excess returns. The fund is authorised to utilise approved derivative instruments for risk management purposes and investment efficiency. Please note that derivative instruments cannot be used to gear the fund's exposure. The underlying managers may utilise strategies for the management of currency exposure. It is the strategy of the fund that international currency exposure may be hedged. The fund has the capacity to change the level and nature of any currency overlay or allocation to underlying managers to manage currency risk.

Standard Risk Measure*

The Standard Risk Measure (SRM) is based on industry guidance to allow investors to compare funds that are expected to deliver a similar number of negative annual returns over any 20 year period. The SRM for this fund is shown below:

Asset allocation

† Returns quoted use the unit price which is calculated using the net asset values for the relevant month end. The prices shown may differ from the actual unit price if an investor is applying for or redeeming an investment. Actual unit prices will be confirmed following any transaction on an investor's investment. Please note that all returns are after the deduction of management fees and expenses and assumes all distributions are re-invested. Where applicable, management fees have been deducted at the highest entry fee option rate. No allowance has been made for entry or exit fees.

Market and portfolio review

There were no manager changes over the quarter. Global shares outperformed, with Royal London and Alphinity being the major contributors in a very strong quarter for global shares. The alternative growth portfolio outperformed its benchmark with good performance from Intermediate Capital Group. An underweight allocation to direct property added value as the asset class had weak relative returns. An underweight allocation to defensive alternatives added value as the asset class had weak relative returns. An underweight allocation to global shares detracted value as the asset class had strong relative returns. Overweight allocations to cash and fixed interest detracted value as the asset classes had weak relative returns.

Future investment strategy

The Fund will continue to be managed in accordance to its objectives and strategies.
