## Investment strategy

The fund gains its exposure to a diversified portfolio of investments through a mix of investment managers. The conservative nature of the fund provides a greater exposure to defensive assets, such as fixed interest and cash with a moderate exposure to growth assets, such as property, Australian and international shares and alternative assets. A mix of passive, factor-based and active investment managers may be selected to manage the assets of the fund providing differing yet complementary investment styles to achieve more consistent excess returns. The fund is authorised to utilise approved derivative instruments for risk management purposes and investment efficiency. Please note that derivative instruments cannot be used to gear the fund's exposure. The underlying managers may utilise strategies for the management of currency exposure. It is the strategy of the fund that international currency exposure may be hedged. The fund has the capacity to change the level and nature of any currency overlay or allocation to underlying managers to manage currency risk.
