BENCHMARKS FOR MULTISERIES FUNDS

The term 'benchmark' usually refers to a recognised market index that the performance of the fund is measured against. Market indices or benchmarks are different for each asset class and are used to assess the relative risk and performance comparisons of an investment portfolio.

Each fund spreads investments across a combination of asset classes and generally has an allocation rate and target (or neutral) allocation for each underlying asset class. The benchmark therefore comprises the performance of the market index for each asset class weighted against the fund's target (or neutral) allocation position.

The benchmark(s) currently used for each asset class are as follows:

Asset class	Benchmark
Cash and short-term securities	Bloomberg AusBond Bank Bill Index
Diversified fixed interest	Australian fixed interest: Bloomberg AusBond Composite 0+ Yr Index International fixed interest: Bloomberg Barclays Global Aggregate Total Return Index Value Hedged AUD
Property	Direct property: MSCI/Mercer Australia Core Wholesale Monthly Property Fund Index (NAV Post Fee) Australian listed property securities: S&P/ASX 300 A-REIT Accumulation Index International listed property securities: FTSE EPRA/NAREIT Developed Net Total Return Index in AUD
Australian shares	S&P/ASX 300 Accumulation Index
International shares	MSCI All Country World ex Australia Index (\$A) ¹
Alternative – defensive ²	Bloomberg AusBond Bank Bill Index
Alternative – growth ²	Bloomberg AusBond Bank Bill Index FTSE Developed Core Infrastructure 50/50 Net Total Return Index Hedged to AUD

¹ A combination of MSCI World ex Australia Index (\$A) Hedged, MSCI All Country World ex Australia Index (\$A) and MSCI Emerging Markets (\$A) Index may be used from time to time, depending on the strategic hedging ratio applied to the international shares portfolio.

² As new alternative strategies are introduced this benchmark will change according to the underlying strategies' benchmark.
