

Product Update – OnePath and OptiMix Wholesale Investment Trusts

August 2016

Updated Standard Risk Measures

The Standard Risk Measure (SRM) for each investment fund offered through OnePath and OptiMix Wholesale Investment Trusts is assessed annually by an external consultant who has calculated the SRM using a model designed to meet industry guidelines, allowing investors to compare investment funds that are expected to deliver a similar number of negative annual returns over any 20-year period.

The Standard Risk Measure is not a complete assessment of all forms of investment risk, for instance it does not detail what the size of a negative return could be or the potential for a positive return to be less than an investor may require to meet their objectives.

Further, it does not take into account the impact of ongoing fees and tax on the likelihood of a negative return. Investors should still ensure they are comfortable with the risks and potential losses associated with their chosen investment fund(s).

As a result of the assessment, the investment funds in the table below have the following SRM rating .

Option Name	Risk Band	Risk Label
OnePath Wholesale Property Securities Trust	7	Very high
OptiMix Wholesale Property Securities Trust - Class B	7	Very high
OptiMix Wholesale Balanced Trust - Class A	6	High
OnePath Wholesale Managed Growth Trust	6	High
OptiMix Wholesale Balanced Trust - Class B	6	High
OptiMix Wholesale Conservative Trust - Class A*	4	Medium
OptiMix Wholesale Conservative Trust - Class B*	4	Medium
OptiMix Wholesale Australian Fixed Interest Trust - Class B	4	Medium

* Irrespective of the fund name being 'Conservative', the Standard Risk Measure of the fund is 4. This means it has been estimated that the fund may have 2 to less than 3 negative annual returns over any 20 year period.

How to read an investment profile
